

## CX4 & CX4A Contactor Controlled Outlets

CX4 and CX4A feature four outlets that are operated simultaneously from a single 24Vdc trigger signal. CX4 series contactors are designed for powering lighting, banks of fans, and other equipment which is operated simultaneously.

To operate the CX4/CX4A, the trigger input (24Vdc) is connected to any desired output on the GC-Pro controller and power (120/240Vac) is connected to the power terminals.

To operate the CX4/CX4A from the GC-Plus or other 120V outlet trigger, use the CX-T trigger cord kit.

### Features

- Wire direct to GC-Pro outputs
- 24Vdc Relay coil voltage
- Heavy duty powder coated sheet metal enclosure
- Fully grounded
- 15A / 120Vac rated CX4
- 25A / 240Vac rated CX4A
- 2-Year full factory warranty – Made in USA

### Controls

- Lights
- Pumps
- Fans
- Etc.

### Application Example

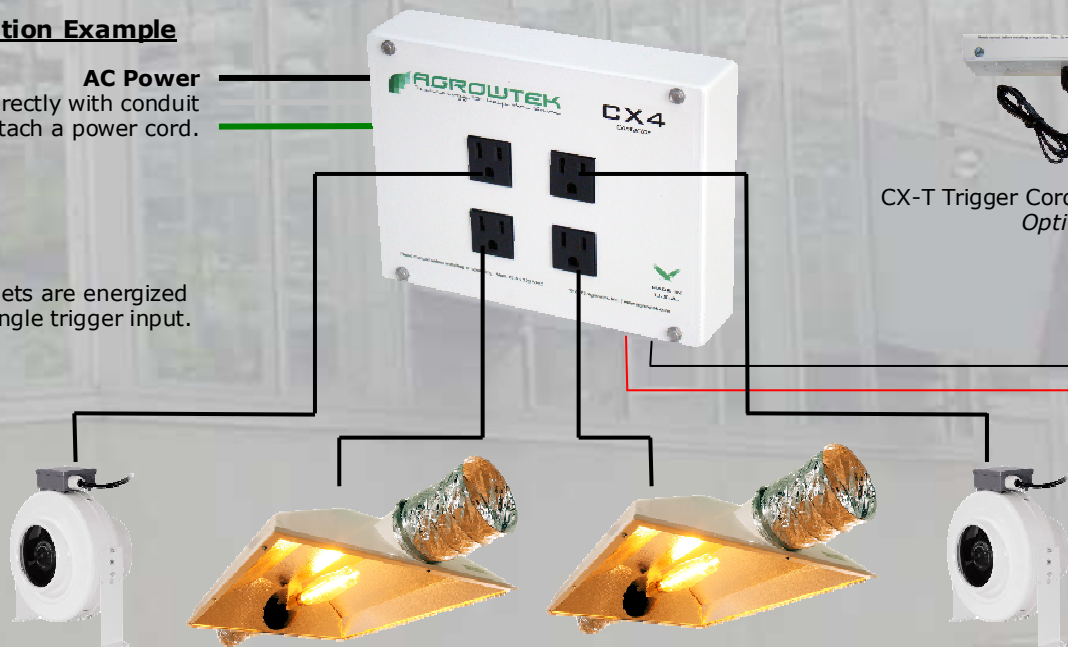

**AC Power**  
Wire directly with conduit or attach a power cord.

All outlets are energized by a single trigger input.

CX-T Trigger Cord Kit  
Optional

**24Vdc trigger**  
GC-Pro Output or Trigger Cord
