

Expand the number of GrowNET ports on your Agrowtek GrowNET digital serial bus network. Connect multiple GrowNET devices to a GrowNET master device such as an LX1 USB AgrowLINK for PC or LX2/LX4 MODBUS ModLINK for PLC applications.

Buffered hub extends the range of bus networks and can provide power to devices from the DC power jack. Includes 8 ports for connecting devices and one port for connecting to the upstream bus.

Hubs may be daisy-chained as required up to the maximum number of ports on a bus (247 modbus/250 GrowNET.)

**Features**

8 GrowNET ports for devices sensors, relays, pumps, cameras, etc.

1-Year Warranty

Provide power to sensors & relays from the hub ports

Tough ABS plastic enclosure

Buffered ports for signal strength

Made in USA
