

Expand the number of GrowNET™ ports on your Agrowtek GrowNET™ digital serial bus network. Connect multiple GrowNET™ devices to a GrowNET™ master device such as an LX1 USB AgrowLINK™ for PC or LX2 MODBUS ModLINK for PLC applications.

Buffered hub extends the range of bus networks and can provide power to devices from the DC power jack. Includes eight ports for connecting devices and one port for connecting to the upstream bus.

Hubs may be daisy-chained as required up to the maximum number of ports on a bus (247 modbus/250 GrowNET™.)

Features

8 GrowNET™ ports for devices sensors, relays, pumps, etc.

1-Year Warranty

Provide power to sensors & relays from the hub ports

Tough ABS plastic enclosure

Buffered ports for signal strength

Made in USA
