

AUTOMATED NUTRIENT & PH CONTROL

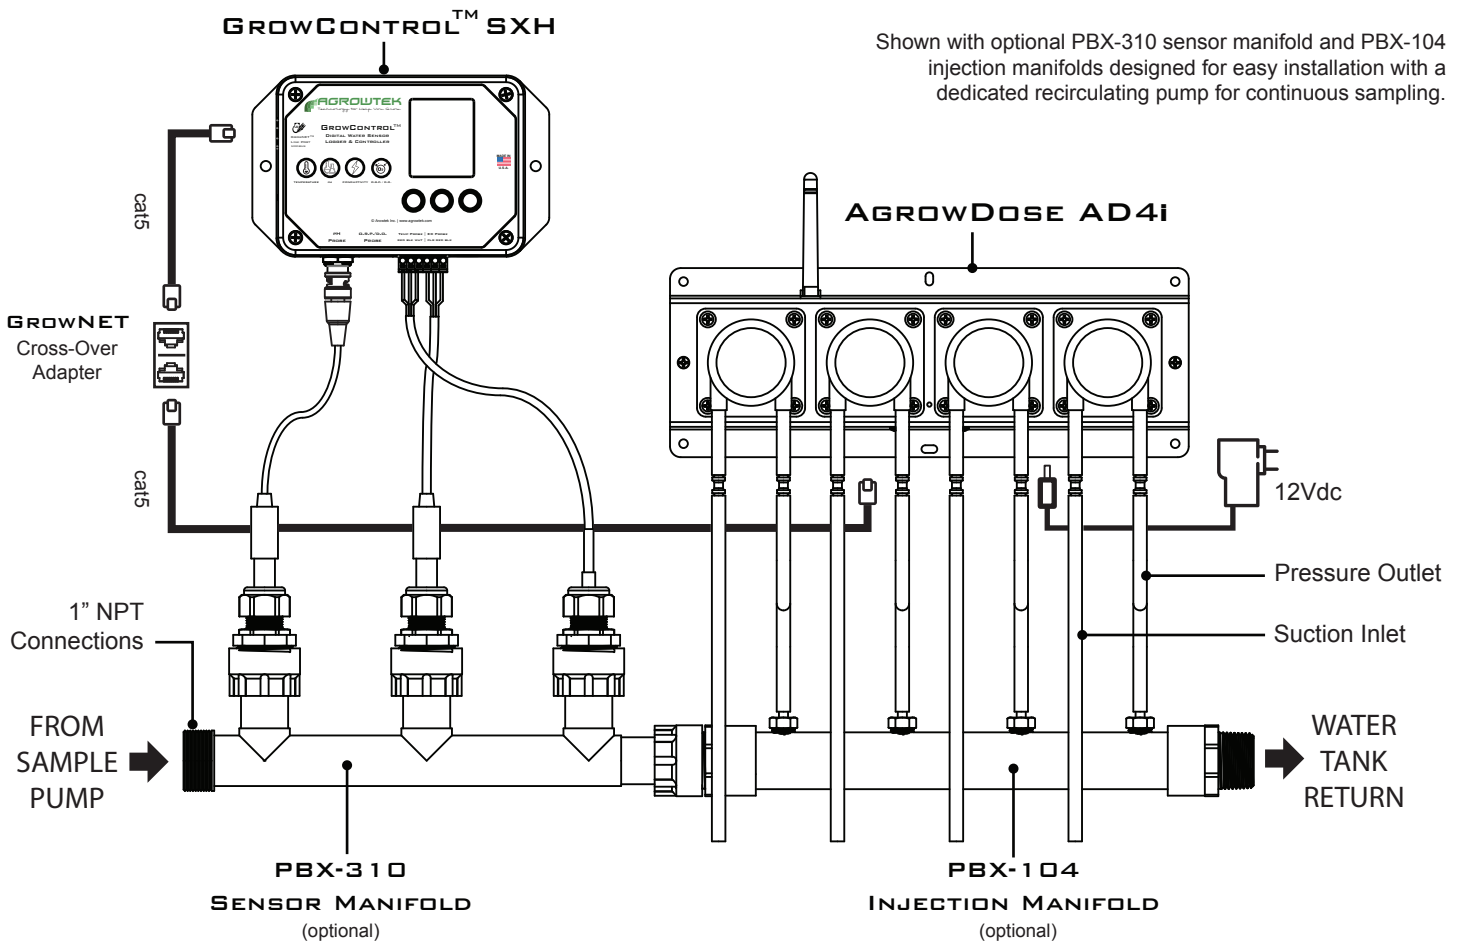

GrowControl MDX Mini Dosing System automates nutrient and pH dosing by combining Agrowtek's digital hydro sensor kit with AgrowDose precision dosing pumps. Each pump can be configured independently for nutrient or pH up/down dosing.

SXH hydro sensor with lcd display allows advanced configuration of the pumps and dosing parameters, manual pump priming, as well as graphing, alarms, data logging and more.

Typical Installation

Shown with optional PBX-310 sensor manifold and PBX-104 injection manifolds designed for easy installation with a dedicated recirculating pump for continuous sampling.

Ordering Options

MDX4 - D W

- WiFi Radio (SXH)
- None: pH, EC & Temperature only
- D: Dissolved Oxygen
- O: ORP
- 2: Dual Pump
- 4: Quad Pump

Optional Accessories
