

## COMPACT VERTICAL TANK SYSTEM

VBT series batch tank system features a compact 24" foot print with integrated pump and heavy-duty stainless-steel tank stand. Available in 55 to 135 gallon capacities.

System is pre-fabricated with pump and plumbing pre-fitted as shown. 1" pump outlet can be faced any direction and includes features to allow plumbing from multiple directions. Stand floor flanges include holes for bolting the stand to the floor.

Designed for plug-and-play use with BDX BatchMatic™ fertigation systems as a mixing vessel for the system. Integrated SXL liquid sensor for detecting when the pump is out of water (tank empty.) High level sensor optional.

Polypropylene tank with polypropylene and PVC fittings.  
Made in U.S.A.
