

VX8i digital control interface features eight (8) 1-Amp transistor (FET) outputs for operating DC powered solenoid and irrigation valves, relays & contactors, etc. Designed to operate standard 24VAC irrigation valves on 15Vdc.

Connects instantly to Agrowtek's master control systems or intelligent sensors via a GrownET port for advanced automated control functions. GrownET port accepts MODBUS RTU communication for PLC control.

LED indicators on the front panel provide status of each output. Rugged metal enclosure for wall mounting. Screw terminal connections and conduit knock-outs for easy electrical installation.

Features

Eight 1-Amp Transistor Outputs with LED status indicators (5A max combined)

PWM Output (6x) capable

Built-In Flyback & Transient Suppression on FET outputs

1-Year Warranty

GrownET™ Digital Communication Port

MODBUS RTU for industrial PLC applications

Durable powder-coated steel enclosure

Made in USA

Status LED's

Typical Applications

Irrigation Solenoid Valves

Custom DC Equipment

GrowControl™ GCX Controller

Connect to GrowControl™ Cultivation Controllers for advanced functions as part of a complete facility control solution. GrowControl™ GCX systems feature intelligent control functions optimized for today's complex growing environments.

USB

Connect GrowNET™ devices directly to a computer using the LX1 USB AgrowLINK™ and free PC software for data logging and monitoring.

MODBUS

GrowNET™ devices are easy to implement on PLC systems with MODBUS RTU and a LX2 ModLINK interface. Multiple GrowNET™ devices can be connected to an interface with HX8 GrowNET™ hubs.
